

The figure displays two horizontal boxplots and their corresponding dotplots. The top group is represented by a red boxplot, and the bottom group by a green boxplot. The x-axis ranges from 1.000 to 1.020. The red boxplot shows a median around 1.007, with whiskers extending from approximately 1.000 to 1.017. The green boxplot shows a median around 1.007, with whiskers extending from approximately 1.000 to 1.017. The dotplots show individual data points for each group, with a central diamond marker indicating the mean. The red group has a mean around 1.009, and the green group has a mean around 1.009.
